

# APES Summer Assignment 2021-22

## Welcome to AP Environmental Science

**Environmental Science** is the study of the interactions of the natural and unnatural (anthropogenic) processes on the physical components on Earth.

The following branches of science are included in the study: ecology, biology, physics, chemistry, botany, zoology, mineralogy, oceanography, limnology, geology, geography, soil science, and atmospheric science.

- Your summer assignment will be on Google Classroom, APES Class - the code is [nghvurk](#)
- The first assignment **JUNE 7st** is the only **MANDATORY** one and will be worth 6 points.
- I will open an assignment every week (only available for that week) worth 3-5 points depending on the assignment and the correctness of your answers.
- They will open Monday at noon until the following Monday at noon.
- You are to accumulate 20 points during the course of the summer (about 8 weeks).
- If you have any questions, please feel free to email me at [apollak@pinewoodchristian.org](mailto:apollak@pinewoodchristian.org)
